

CANTEEN MANAGEMENT SYSTEM

CANTEEN MANAGEMENT SYSTEM

Canteen Management system is a Canteen based system which stores the records of the employee who is using Canteen for Lunch and dinner, this software maintain the current balance amount of the employee, and his lunch and dinner details.

This software is designed to cater the needs of all kind of possible users e.g., factories, offices etc. To cater to the needs of the factories where Canteen is required to provide Canteen facilities to the employee.

Advantages of having this type of system are:

- This system maintain the record of the employee like , which item he take at lunch time or any other time and the cost of the each item and total amount of all item.
- This system maintains the record of employee current balance amount.
- This system maintains record of the employee transaction.
- This system check the balance of the employee before giving permission to take any item .If the balance available then it give permission to take the item otherwise denied.
